

**The Teatro della Luna is the Milanese stage for the big musicals and is also available for events such as conventions, congresses, promotional activities and television productions, as well as pre and after show receptions.**

With 1730 places - on a single level, over a sloping surface, with ample space between each row of seats, in order to guarantee the maximum level of comfort, visibility and sound quality for all spectators - the Teatro della Luna is also suitable for smaller events, thanks to its impressive modularity.

The vastness of the stage (800 sqm) and the wealth of technical options, which were designed to host the most significant theatrical productions, ensure that the requirements of all major events are fully met. The venue offers numerous suspended structures, 18 changing rooms and a control room.

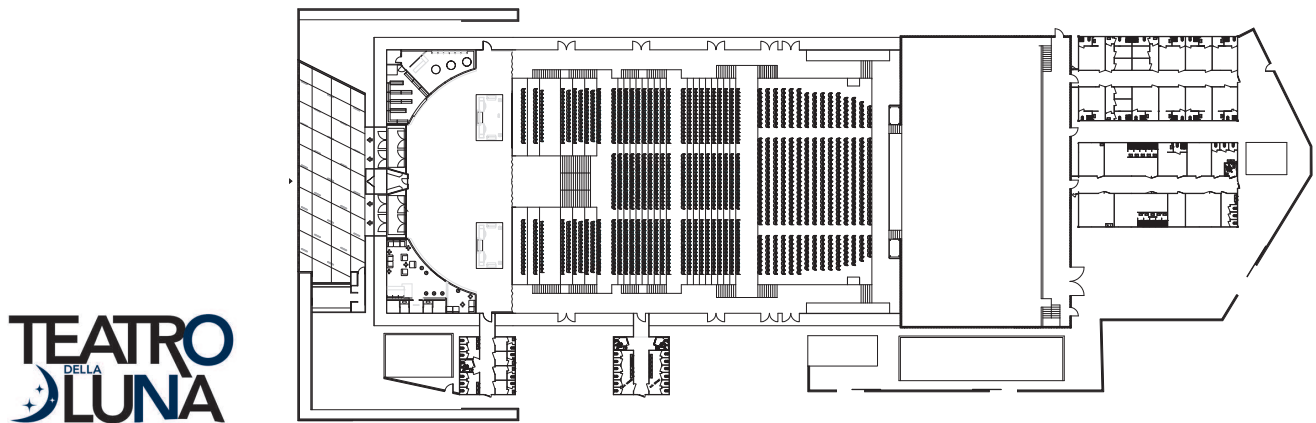

Amongst the secondary spaces, apart from the large and elegant foyer, which has two refreshment points and a cloakroom area, the Broadway Hall can host about 50 people in a private and highly atmospheric environment. The Hall is also suited for organising quality catering services.

The Teatro della Luna is situated opposite the Mediolanum Forum and has a large parking area. The theatre will soon be reachable through a dedicated stop of line 2 of the Milanese Underground.
